Certification

It is hereby certified that Manochehr Riahi is one of our most active board members who runs weekly news files, international coordinations, pilot project proposals, PR, etc. at the Center for Ecological Technology in Gothenburg.

Manochehr represents this center as an international coordinator and is chosen as pilot project leader in the ongoing project in Kortedala, so-called "CBO-Community". For this, Manochehr has organized a Think Tank in Kortedala in order to gather the volunteers who want to be part of the pilot project.

We hope to attract and strengthen the voluntary residents of the Kortedala district and spread the new lifestyle towards the Sustainability Goals. We at the Center for Ecological Technology strongly support Manochehr for his valuable efforts to run this pilot project in cooperation with the local residents of Kortedala district.

Gothenburg 2023-10-20

Björn Martén

chairman of the board
Center for Ecological Technology
